MOHAND MOUSTAFA

Aspiring Data Analyst | Machine Learning Enthusiast | DEPI Trainee
Giza, Egypt | +20 100 967 9235 | mouhanadmoustafa678@gmail.com | LinkedIn | GitHub

PROFESSIONAL SUMMARY

Computer Science and Statistics student at Helwan University with hands-on experience in Python, SQL, Excel, and Power BI for data cleaning, exploratory data analysis, and dashboard development. Built end-to-end analytics projects processing 15,000+ records to surface actionable business insights. Currently expanding skills in Machine Learning and Deep Learning through the DEPI AI & Data Science Internship (Microsoft Machine Learning Engineer track). Seeking a Data Analyst or Machine Learning internship to apply strong analytical, statistical, and programming skills to real-world business problems.

TECHNICAL SKILLS

Programming: Python, SQL, C++, JavaScript (Basic)

Data Analysis & Visualization: Pandas, NumPy, Matplotlib, Seaborn, EDA, Data Cleaning, Data Preprocessing, KPI Analysis

BI & Reporting: Power BI, Excel (Pivot Tables, Pivot Charts, Power Query, Lookup Functions, Conditional Formatting)

Database: SQL

Tools & Platforms: Excel, Power BI, Git, GitHub

Currently Learning: Machine Learning, Deep Learning, Computer Vision, NLP

PROJECTS

Restaurant Sales Analysis Dashboard *2026*

Technologies: Python, Pandas, SQL, Excel, Power Query, Power BI

- **Cleaned and preprocessed** a 15,000+ record restaurant sales dataset using Python (Pandas), resolving missing values, duplicate records, and inconsistent data types to ensure data reliability.
- **Performed exploratory data analysis (EDA)** to uncover sales trends, customer behavior patterns, and key performance drivers.
- **Built KPIs, pivot tables, and pivot charts** in Excel to track revenue, order volume, and product-level performance.
- **Designed an interactive Power BI dashboard** integrating Python, SQL, and Power Query outputs, translating findings into actionable business recommendations.

Sales Performance Analysis Dashboard *2026*

Technologies: Python, Pandas, NumPy, Matplotlib, Seaborn, Excel

- **Collected and explored** sales data, applying data cleaning and transformation techniques in Python to prepare it for analysis.
- **Calculated KPIs** and performed EDA to evaluate performance across products and regions.
- **Built visualizations** with Matplotlib and Seaborn to communicate trends and support data-driven decision-making.
- **Presented business recommendations** derived from the dashboard, highlighting opportunities for revenue growth.

EDUCATION

Bachelor of Science in Computer Science & Statistics *Expected Graduation: 2028*

Faculty of Science, Helwan University | GPA: 3.64 / 4.00

Relevant Coursework: Data Structures, Algorithms, Database Systems, Python for Data Analytics, Statistics, Probability, Linear Algebra, Data Science

CERTIFICATIONS & TRAINING

- Microsoft Data Analyst Professional Certificate (Completed, February 2026)
- DEPI — AI & Data Science Internship, Microsoft Machine Learning Engineer Track (In Progress, 2026)
- IBM Data Science Professional Certificate (In Progress)
- CS50: Introduction to Computer Science — Harvard University

LANGUAGES

Arabic: Native

English: B2 (Upper Intermediate)
